FROM:

SUBJECT: NWEAMP Executive Review Board Meeting on Logistics

1. Attached is an outline of major points that will be covered in the 2 August briefing by the NWMP Logistics Working Group to the NWEAMP Executive Review Board. According to [redacted] of the Logistics Working Group, every attempt was made to coordinate their efforts with those of the Intelligence Working Group (IWG), but the preliminary nature of the IWG effort and the compressed time schedule for the overall NWMP-II study precluded development of an integrated report. [redacted] anticipates addressing the ability to support and to maintain a residual strategic airborne reconnaissance (SR-71, RC-135) force under Phase III. [redacted]

2. The Forces Working Group has not completed wrapping up the results of their Phase II study. They anticipate having a completed outline by Thursday, 4 August. [redacted]

PRELIMINARY FINDINGS
LOGISTICS WORKING GROUP
NWMP-II

- o No intelligence assets/programs addressed
- o Assets considered
 - ICBMs
 - Fleet ballistic missile submarines (SSBNs)
 - Bombers/Tankers
- o ICBMs
 -
 - Endurance of surviving force limited
- o SSBNs
 - Self-contained independent asset
 - Measures to further extend endurance under study
- o Bomber/Tanker force
 - Limited capability survives--estimated up to 50 bomber/tanker sorties in one week; 100 sorties in one month.
- o Proposals for follow-on work
 - Verify initial bomber/tanker survivability findings based on modeling.
 - Provide Forces Working Group more realistic aircraft survivability data based on results of modeling.
 - Quantify programmatic resources required to overcome identified logistics shortfalls.
 - Extend aircraft analysis to include strategic reconnaissance (SR-71, RC-135) assets.
